

The airwaves belong to the public. I am requesting that the Fairness Doctrine be re-instituted, allowing citizens access to the real news and not just what those few who actually own the media now want to pass off to news. I also think those sitting on (and chairing ) this important commission be folks that truly have the best interest of the public at heart. Further deregulation does not facilitate an educated population.

Please do the right thing. Extend the deadline and increase the public hearings. Publicize what you are doing and give people a chance to be heard.

Thank you
